## INTRODUCTION

The 1947 Annual Report of Financial Transactions of Cities and Counties of California is the thirty-seventh issue published by the State Controller. It contains fiscal information covering 294 cities and 57 counties, the City and County of San Francisco being classified as a city. The current issue includes the following additional sixth-class cities, incorporated during the calendar year of 1946:

Coachella in Riverside County  
 Folsom in Sacramento County  
 Galt in Sacramento County  
 Guadalupe in Santa Barbara County  
 Kernan in Fresno County  
 Pismo Beach in San Luis Obispo County  
 Portola in Plumas County

During the calendar year of 1947 the following sixth-class cities were incorporated:

Gonzales, Monterey County, January 14, 1947  
 Greenfield, Monterey County, January 17, 1947  
 Live Oak, Sutter County, January 22, 1947  
 Barstow, San Bernardino County, September 30, 1947

According to estimates by the county auditors, the total population for California on June 30, 1947, reached 9,604,343, an increase of 560,673 since June 30, 1946, with the greater portion of the increase living in unincorporated sections of the State. Estimates by the city clerks totaled 6,929,373, an increase of only 150,475 during the past year. Division of population into city and county classifications remains practically unchanged since the 1940 census at which time 71 percent was urban and 29 percent rural, against the present 72 percent urban and 28 percent rural. Since 1940 the total estimated increase is 2,696,956, and in making comparisons of current expenditure totals this essential factor of additional population, affecting every branch of government, state, county, city and district, must be given consideration.

Also, changes in present-day values, monetary, social and economic, have a direct bearing on increases in receipts and payments of the years succeeding the war. Totals are given from 1940 through 1947, but because of these differences we have commented only on changes within the past year.

\* Excluding City and County of San Francisco.

Assessed valuations in the past year increased over 22 percent or nearly two billion dollars, while the increase of \$59,281,910 in bonded debt is the largest increase in this classification in a single year since the first publication of the Controller's annual report. New bonds were issued in the sum of \$77,823,305. The county bond total is broken into three classifications—general county bonds for which the entire county is taxed, school district bonds and special and assessment district bonds. During the year ending June 30, 1947, no general county bonds were issued; 38 counties issued school district bonds totaling \$67,666,450 and 16 counties issued special and assessment district bonds for \$10,156,855. From the moneys received from the sale of these bonds, the counties reported payments of only \$18,027,277, leaving a current unexpended balance of \$59,796,028 which accounts for much of the \$84,071,812 difference between the 1947 totals for receipts and payments.

County receipts in the past year have increased \$175,321,994. The total for each classification exceeds that of 1946, the largest increase being \$82,393,968 from tax collections. This was entirely in accordance with the increase of \$86,859,136 in the tax levy of the preceding year. Subventions and grants increased \$32,497,674, and again is distributed through each of the subdivisions of this classification—educational apportionments, categorical aids, motor vehicle license and gas tax moneys, tuberculosis subsidies, etc.

Total payments for all purposes except trust accounts increased \$143,520,848 during the year ending June 30, 1947. Classifications showing the largest increases were education \$50,900,470, charities and corrections \$32,629,772, payments from proceeds of bond sales \$15,692,925 and agency transactions for cities and districts \$12,712,931.

\* Including City and County of San Francisco.

Total city receipts in the past year decreased \$15,673,541, but this decrease lies entirely in the trust section of the report. Trust receipts for 1947 were \$91,470,845 less than for 1946. Over 60 percent of this decrease appears in the Los Angeles City report and is caused by the difference for the two years in receipts from investments sold or matured. The current city governmental receipts, representing all receipts except trusts, increased \$75,797,305 or 21.6 percent since 1946. General property taxes increased \$17,951,091, subventions and grants \$14,210,585, miscellaneous \$14,408,031 and public service enterprises \$14,598,070. Eighty cities this year show a collection of over \$11,000,000 from parking meters, and 56 cities collected over \$5,000,000 from sales taxes. These new sources of revenue have been lucrative. Until they have become established as a part of municipal government, they have been shown in the report under miscellaneous receipts and account for the sharp increase in the amount of this classification.

Payments for interest and redemption of debt, special assessment purposes and trusts have decreased in the past year, although total payments show 8.4 percent increase. Largest increases were public service enterprises \$31,635,475, protection to person and property \$15,752,006 and streets \$8,223,054.
